| MarkeDroid | Climate change is a reality, and everyone can contribute to reducing CO2 emissions. One way to do this is for homeowners to become renewable energy producers and thus contribute to sustainability. However, a challenge arises: fluctuating spot prices make the return on investment (ROI) low, and the flexibility of the energy grid is unstable. Moreover, individuals lack access to flexibility markets to help balance the energy grid. The solution is to support the transition to smart and sustainable renewable energy production through installers who assist homeowners in maximizing their investment ROI. The solution is plug-and-play, making it accessible to every customer. This significant change turns your solar battery into a cash machine rather than a cost. | https://www.markedroid.com/ | Europe & Israel | Entrepreneurial |
| MaRS | MaRS is North America's largest urban innovation hub and Canada's top supporter of climate tech startups, working with more than 240 entrepreneurs across the country. | http://www.marsdd.com/climate | North America | Non-profit |
